---

Activities Performed by EPA START personnel on Sunday, September 2, 2012 between 0800 hrs. to 2000 hrs. included the following:

- 24/7 air monitoring/oversight was conducted at the drilling site. Duties included review of facility's real-time monitoring data with the facility/contractor personnel, review of alarm readings and also calibration and maintenance records for facility's air monitoring instruments, and hand-held air monitoring at 9 (nine) established monitoring points. Parameters monitored included CO, H2S, VOCs, LEL, and O2. All readings were below the low action levels and within normal O2 readings. All hand-held air monitoring was conducted using a MultiRae air monitoring instrument. EPA START completed a total of 6 rounds of hand-held air monitoring at the 9 monitoring points.
- Other observations noted that drilling and borehole sampling activities were ongoing.
- No additional problems or issues were encountered.
